

EXPAND YOUR OPPORTUNITY

EQUINOX[®]
LOUVERED ROOF

INCREASE YOUR BUSINESS POTENTIAL

A man and a woman are sitting at an outdoor dining table, smiling and looking at each other. The woman is on the left, wearing a white top and a gold necklace. The man is on the right, wearing a white shirt. They are both holding glasses of orange juice with fruit garnishes. On the table, there is a pizza on a wooden board and a bottle of olive oil. The background is a blurred outdoor setting with a swimming pool and some furniture.

Maximize the comfort and functionality of your outdoor dining space year round.

Equinox Louvered Roof systems are a sensible upgrade for any business, such as restaurants, hospitality, hotels, club houses and builders, which need to increase its usable outdoor seating area. The system is designed to be versatile and fit with most architectural styles.

OUTDOOR DINING IN SUN, SHADE OR RAIN

"Never hesitate to take patio reservations again."

GM of Lure, Atlanta

The Equinox Louvered Roof embodies smart design that elegantly increases your clients' outdoor space. Elevate their environments with on-demand sunlight, shade or rain protection.

- Increase dining options and capacity at a lower cost than renovations
- Versatile – complements brick, stucco, fiberglass and others
- Customizable – integrates with existing architecture
- Motorized for easy operation
- 160° range of motion on demand
- Louver control of independent seating areas
- Full gutter system for dripless rainwater management
- All metal materials that perform well in all environments

Wide open rooftop spaces

Location: Local Restaurant, Valletta, Malta

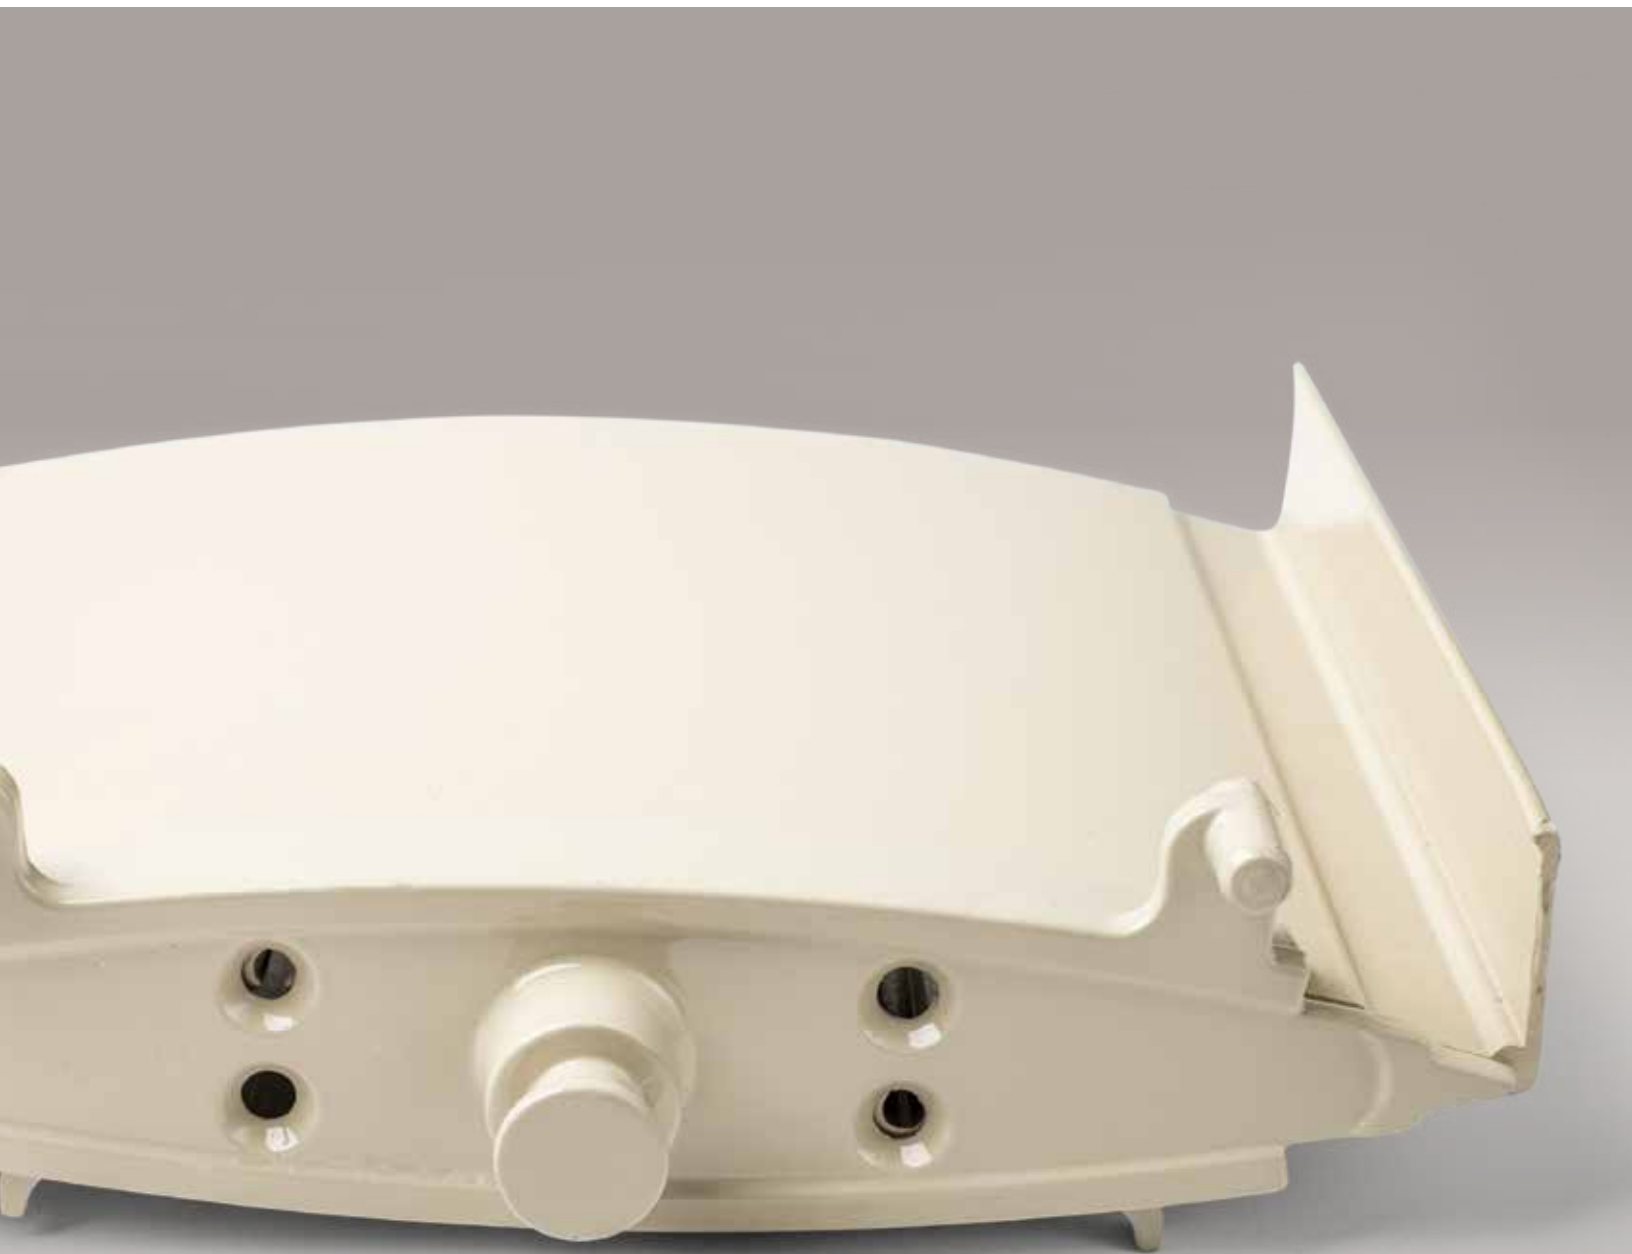

Project Details: louvers and columns in white

LIFE DESIGNED FOR "OOHS" AND "AAHS"

Engineered for unparalleled control.

Equinox Louvered Roof is manufactured with quality elements, precision engineering, and aesthetic options to fulfill your needs of the ultimate outdoor space. Our patio system is strong and conforms to nearly all wind and snow load requirements. The louvers are versatile to integrate flawlessly into any architectural style, such as gable roofs, bay windows, doors, or angled roofs and walls.

FUNCTIONALITY BONDS WITH PERFORMANCE

Precision Engineered Motor and Louvers

An innovative system of rotating gears drives the louvers into the perfect position for ventilation, sun blocking or rainfall protection. Designed with extruded aluminum and stainless steel components the system is strong, lightweight and durable. The low maintenance louvers can be positioned anywhere within their 160° range of motion for the exact amount of protection or ventilation desired.

Wired Multi-Bay Control

With the flip of a switch, a convenient panel easily rotates the patio system louvers from fully opened to a solid roof in a matter of moments and adjust various bays. No matter what the degree of the sun, optimize every section of the patio.

Solar Battery

Drawing, storing, and converting the sun's energy, the battery cell powers the motor that rotates the louvers. The louvered roof needs no wiring and uses no power from your business. It is both renewable and sustainable. The Equinox Louvered Roof solar battery is securely mounted in a discreet and sunny corner of your patio. Non-solar power systems are also available.

Built-in Gutters

One of the more ingenious features of the Equinox Louvered Roof system is its built-in gutter system. At installation, the louvered roof is precisely angled to ensure that rainwater flows into the gutters along the perimeter of the system. When coupled with downspouts, the water flows down and out away from your business, keeping all under the roof dry and comfortable.

10-Year Warranty

Equinox Louvered Roof systems are made to last. Equinox Louvered Roof is made from all metal components providing greater durability than traditional patio covers. Unlike plastic or fabric, our metal components will perform in both heat and rain environments. We are committed to bringing you products of the highest quality and value.

DESIGN YOUR OPPORTUNITY

Envision your Equinox Louvered Roof system expanding your business. Applications include patios, decks, spas, swimming pools, outdoor kitchens, BBQ areas, gazebos, courtyards, entryways or anywhere that sun, light and weather control is desired. To start planning your project, visit EquinoxRoof.com. **View our gallery and visualizer for more inspiration.**

Colors and finishes:

Available in white, sandstone and clay the Equinox Louvered Roof system enhances outdoor areas. Virtually any material and finish can be applied to the Equinox Louvered Roof frame to achieve your desired look, feel, and branding standards.

Customize with design options:

Customized columns and beams provide options that complement you business' style. Round, tapered, square, and fluted are just a few possibilities.

Designer fans and lighting systems can be wired into your Equinox Louvered Roof for the total experience.

Radiant heat and misting systems can easily be integrated into your patio system to provide comfort to your customers during warm days and cool nights

Calculate you possible ROI

"NOTHING IS MORE EXPENSIVE TO A RESTAURANT THAN AN EMPTY TABLE"

-GENERAL MANAGER, LURE RESTAURANT

Optimize seating, maximize revenue.

Covering your restaurant's patio with an Equinox Louvered Roof will extend its use during rainy and excessively hot or sunny days. Calculate the potential revenue increases for your business in the chart below or visit EquinoxRoof.com/resources/#roi-calculator.

Your patio seating

Step 1: Enter the number of your outdoor tables

Multiply the number of outdoor tables by appropriate number of tops

1-Person Outdoor Bar Stools	1 x
2-Person Outdoor Tables (2 Tops)	2 x
4-Person Outdoor Tables (4 Tops)	4 x
6-Person Outdoor Tables (6 Tops)	6 x
8-Person Outdoor Tables (8 Tops)	8 x
TOTAL Patio Seating	

Step 2: Fill in the chart below

Number of Table-Turns per Day	
Average Revenue per Patron (in dollars)	
# of Rainy and Sunny/Hot Days per Year	

Step 3: Insert the information from above into the correct fields below and multiply

$$\left(\frac{\text{Total Patio Seating}}{\text{Number of Table-Turns}} \times \frac{\text{Average Revenue Per Patron}}{\text{\# of Rainy and Hot Days per Year}} \right) \times \text{Estimated Increased Annual Revenue} =$$
